

## **Bachelor Business Science and Management**

The typical tasks of the Bachelor of Science arise from any situation in which managerial know-how is required. The multidisciplinary way of thinking and interdisciplinary education of the Bachelor of Science are the reason for the fact that they are often assigned cross-divisional projects and thus multiple job assignments are possible – for example in Materials Management, Technical Sales and Distribution, Human Resources Management, Controlling, Corporate Planning or Consulting and much more.

The extensive theoretical knowledge is acquired in 10 weeks semesters at NORDAKADEMIE Hochschule der Wirtschaft (Business school) in Elmshorn. High-level lectures are guaranteed by the generous technical equipment and study groups of about 30 students. 13 weeks trainings take place in turn in the company. The student gets familiar with the single departments during his on-the-job training periods. The students will be introduced to their future tasks by carrying out project works after having acquired the necessary basics.
